

Assignment 1 – Project Management

Part 2 - Estimation

Select at least one project from the datasets given on BlackBoard. Generate at least two estimation methods from the data (e.g. regression, trees, NN) and compare them using multiple evaluation techniques from the one provided here:

- <http://danrodgar.github.io/DASE/evaluationSE.html>

Notes:

- You can use any language/tool of your choice
- The datasets are also available here:
 - o <https://github.com/danrodgar/DASE/tree/master/datasets/effortEstimation>
